

MoSPI Survey Intelligence Platform — Validation Report

Generated: 2026-08-16 11:06 UTC

1. Dataset Information

Filename: chhv12025.csv

Dataset ID: e473706b

Uploaded: 2026-08-16T10:22:56.299623

Total Records: 270,472

Total Variables: 48

2. Data Quality Summary

Integrity Violations: 3437

ML Anomalies: 25983

High-Risk Records: 275

Overall Missing Values: 1.9%

3. Statistical Findings

month: mean=6.5, median=6.0, std=3.45, min=1.0, max=12.0

ssu: mean=2.58, median=2.0, std=1.48, min=1.0, max=12.0

hh_size: mean=4.25, median=4.0, std=1.97, min=1.0, max=30.0

hce_tot: mean=14382.71, median=12300.0, std=9108.47, min=400.0, max=332333.0

4. ML Anomaly Detection

Algorithm: Isolation Forest

Features Used: month, ssu, hh_size, hce_tot, llease, rent, interest, pension, remit, inc_tot, nsc, mult, totalsd, smallh

Anomalies Detected: 25983

5. Cluster / Geographic Analysis

Total Clusters: 100

High-Risk Clusters: 0

6. Enumerator Analysis

Total Enumerators: 169

Alerts: 0

7. Risk Distribution

Low Risk: 244173 records

Medium Risk: 26024 records

High Risk: 275 records

8. Recommendations

- 275 high-risk records require immediate supervisor review.
- 3437 integrity violations should be investigated and corrected.
- 25983 ML-detected anomalies warrant further statistical review.

Report generated automatically by MoSPI Survey Intelligence Platform.
